Download scheduler for mac If I'm actively writing, I might prefer more frequent backups than Time Machine's hourly setting, and Backup Scheduler can sync as often as once every ten minutes. You'll also want to consider things like portability — after all, a desktop computer simply isn't going to be a practical computer to take to work or school every day. That also brings up screen size — the bigger the screen, the more immersive things like movies might be. If, however, you're a student who needs access to the internet and word processing, you'll have more than enough power in a less powerful computer like the MacBook. If you're a video editor or media professional, it's more likely that you'll need the raw power of the Mac Pro over the basic performance you'll find in the standard MacBook. The smaller, however, the more portable the computer. Note that ath_hw_setbssidmask updates the main MAC address register for both the ath9k and ath9k_htc drivers [3].
